

4ES WORKSHOP

09.10. – 15.10.2016

Sheffield

Paula Saarela

Train from Manchester to Sheffield

William's Apartments
Sheffield

Our first day was mainly
travelling to Sheffield.
Helsinki - Amsterdam - Manchester - Sheffield

Sheffield College, starting workshop

Before getting our workshop tasks we had presentations by Mark Phillips from Design Futures.

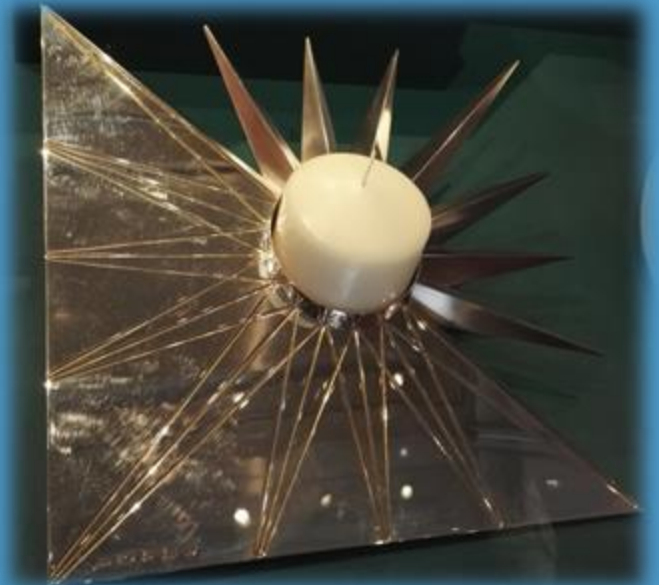

Our workshop task was to think about problem around bicycling, solve the problem and invent a bicycle accessory which would solve our problem.

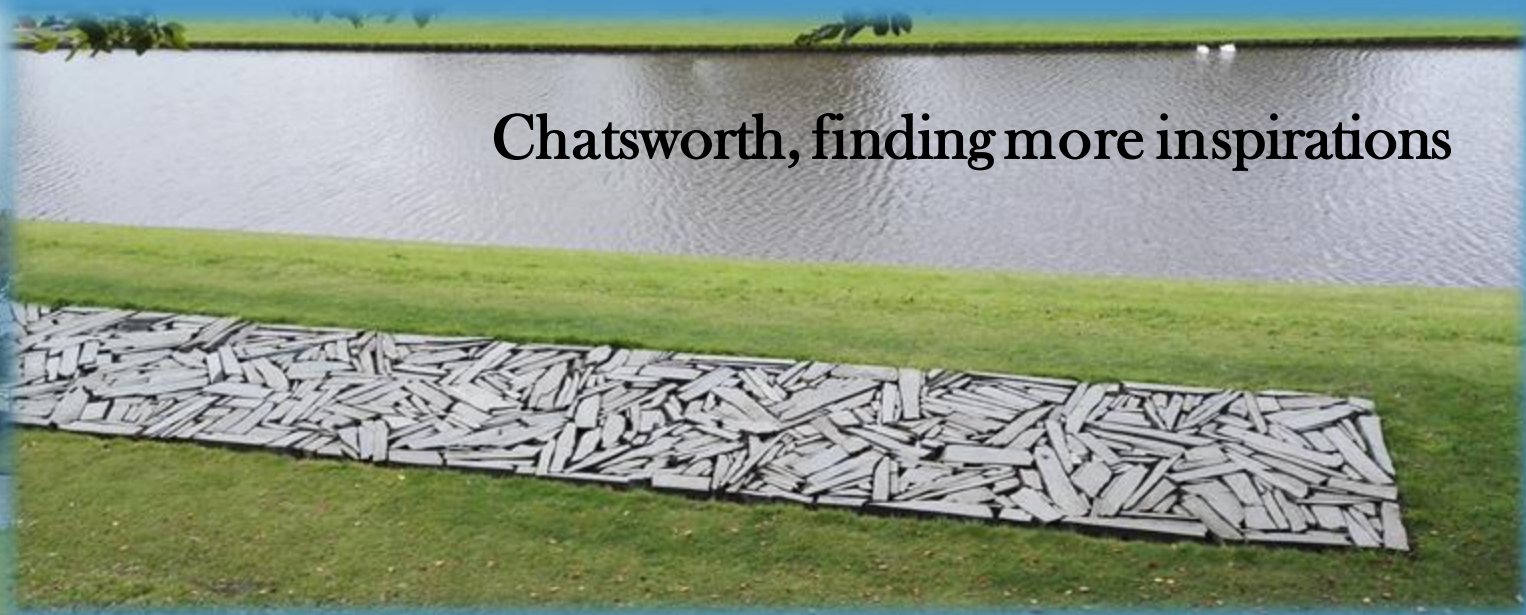

Andy wishing us welcome to Sheffield College

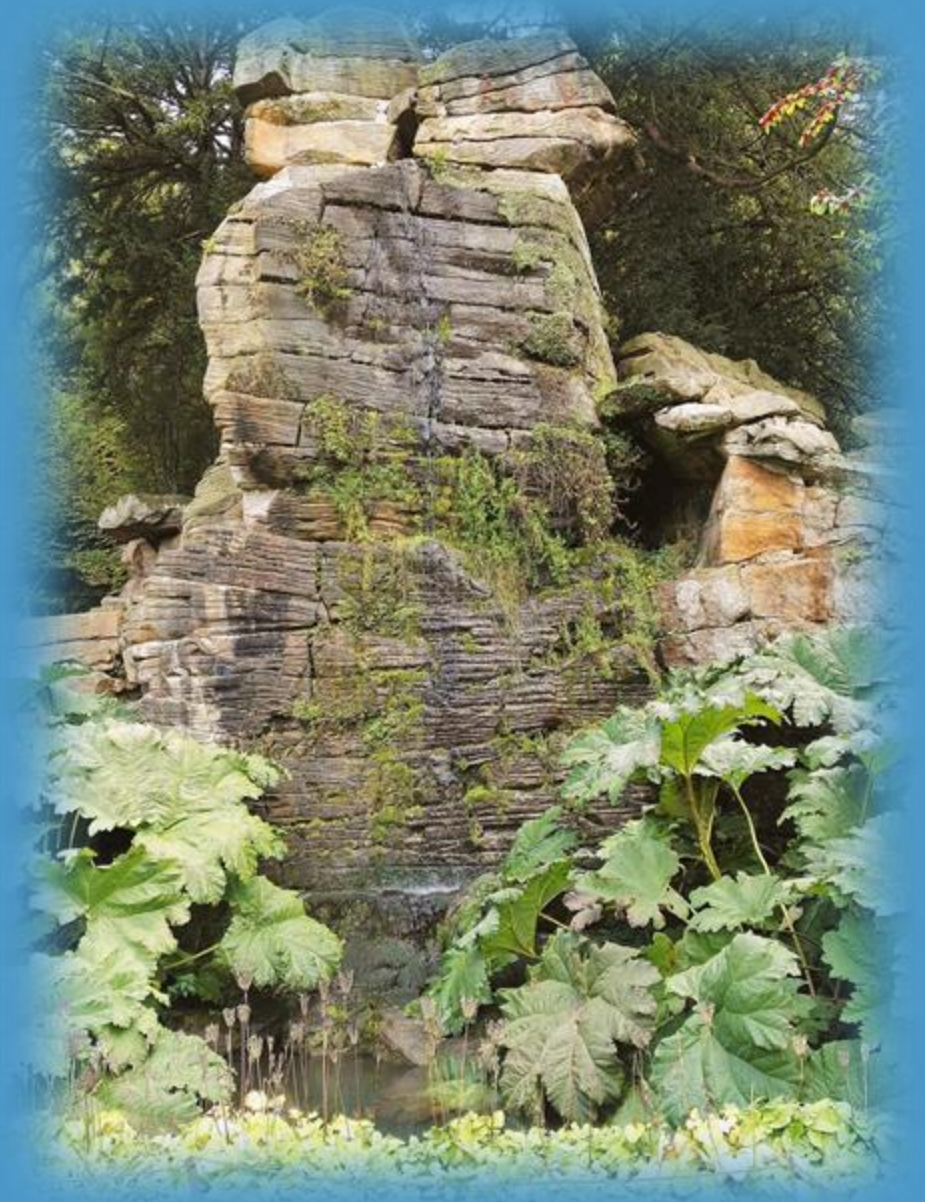

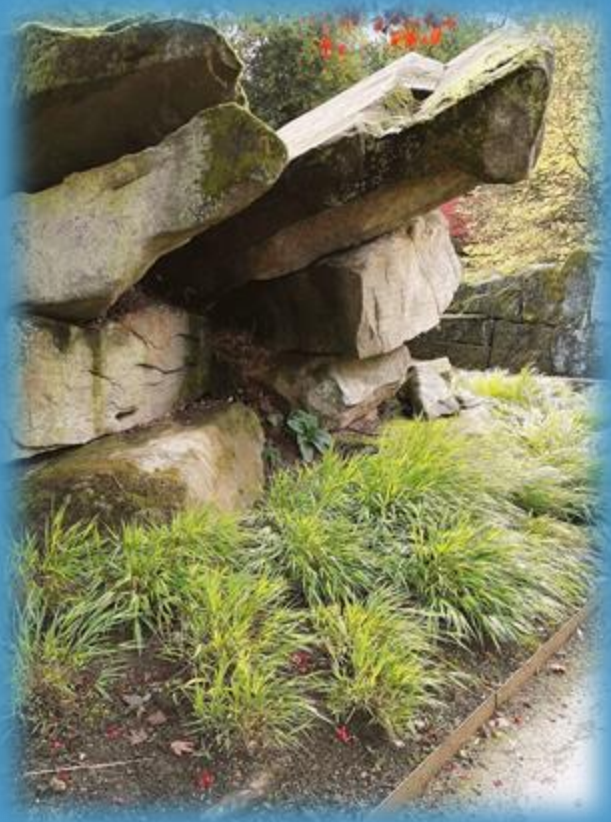

Millenium galleries – finding inspirations

Chatsworth, finding more inspirations

Chatsworth, rock garden

I totally fell in love with this rock garden.
All rocks was brought here rock by rock, without any machines.
I loved all Chatsworth, we just had too little time to spend in there.

Beauty of the nature from Chatsworth

David Mellor Gallery and shop

We visited also at David Mellor gallery. He had designed many things, but most usually seen in Sheffield was those traffic lights, bus stops, trash cans etc.

There was also Finnish products at the shop.

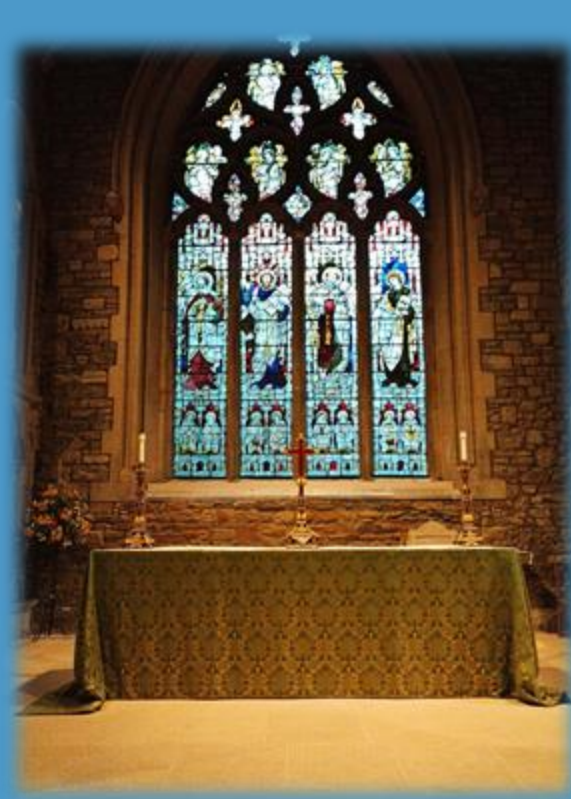

Our group, presentation

Our group had many ideas. Our final product idea was raincover for bicycle. It has a bag where is telescopic poles (like fishing pole), which can be lifted up to hold raincover over the cyclist. Raincover is attached also to the bike on the front.

The Sheffield Cathedral

The Cathedral was close to our apartments at Sheffield. We visited there on our own time. Luckily we did, there was so many beautiful little details everywhere you looked.
